

KESHAV BAJAJ

FULL STACK DEVELOPER

Bangalore, India • +91 82737 38353 • keshavbajaj1708@gmail.com
github.com/keshav1727 • linkedin.com/in/keshav-bajaj-15b4181a8

PROFESSIONAL SUMMARY

Full Stack Developer building client websites and internal tools with **Next.js**, **Node.js**, and **PostgreSQL**. Delivered 4+ production portals with **role-based authentication**, database-backed user views, and end-to-end ownership from scoping through deployment. Combines frontend polish with backend integration to ship business-ready web applications.

SKILLS

Technical Skills: JavaScript, TypeScript, React, Next.js, Node.js, Solidity

Frontend Engineering: Responsive web design, Tailwind CSS, State management, Web accessibility

Product Delivery: Unit testing, End-to-end testing, CI/CD pipelines, API integration, Version control

EXPERIENCE

Frontend Developer (Full-Time)

Jun 2026 - Present

SurfCash - Remote

- Took ownership of the SurfCash frontend, leading new feature development and ongoing platform maintenance after transitioning to a full-time role.
- Collaborated with backend and product teams to enhance the platform's on-chain features and optimize UI performance and reliability.

Frontend Developer (Part-Time)

Mar 2026 - May 2026

SurfCash - Remote

- Revamped the SurfCash platform UI, rebuilding core product screens with React and Tailwind CSS for a cleaner, more responsive experience.
- Integrated Perena, a Solana-based stablecoin yield and liquidity protocol, letting users earn on-chain yield on stablecoin balances in-app.
- Built an end-to-end staking page, connecting the frontend to on-chain deposit, yield-tracking, and withdrawal flows.
- Developed the frontend for token swap and cross-chain bridge features, integrating on-chain transaction flows into a responsive interface.

Software Development Intern

Jul 2025 - May 2026

Luganodes - Remote

- Built an internal AI agent that fetches tweets from selected industry handles and auto-generates on-brand draft posts, streamlining the content workflow.
- Helped build the Luganodes company website, developing responsive frontend interfaces with React and Next.js.

EDUCATION

B.Tech, Computer Science (Data Science)

Sep 2022 - Jun 2026

ABES Institute of Technology - Ghaziabad, UP

PROJECTS

CropWise • Blockchain Agri DApp - TypeScript, Solidity, Hardhat, IPFS, Node.js

Sep 2025

A decentralized app for farmers to register, sell, and trace crops on-chain, ensuring full supply-chain transparency. Integrated QR-code traceability and on-chain data verification connecting farmers, distributors, and consumers.

FreeLedger • Freelance Escrow Platform - Solidity, Hardhat, TypeScript, Next.js, LLM

Jul 2026

A marketplace where a company posts a project, freelancers apply, and payment is locked into a smart-contract escrow the moment a freelancer is assigned. Designed a two-stage payout flow: an AI review of the submitted work releases half the escrowed funds, with the balance released on the client's final sign-off.

Finance Copilot • AI Statement Analyzer - Next.js, TypeScript, Node.js, LLM

Aug 2026

A tool that ingests bank, card, UPI, and wallet statements in CSV, PDF, Excel, or photo format and automatically categorizes every transaction. Added a natural-language query interface so users can ask spending questions directly against their parsed data.

LEADERSHIP

- **President, ISTE Student Chapter** - ABESIT, 2024-25. Led tech events, workshops, and innovation drives.
- **President, IT Technical Club** - ABESIT, 2024-25. Ran coding contests and peer-to-peer learning sessions.
- **Lead Organiser, Hacknovate 6.0** - 2025. Ran a 300+ team hackathon end-to-end.
