

Keshav Bajaj

Full-Stack Developer • React • TypeScript • Next.js • Solidity

+91-8273738353 • keshavbajaj1708@gmail.com • github.com/keshav1727 • linkedin.com/in/keshavbajaj

SUMMARY

Full-Stack Developer building responsive, production-grade web apps with React, Next.js, and TypeScript. Experienced across frontend, API integration, and end-to-end delivery, with hands-on Web3 and blockchain project work.

SKILLS

Languages: Python • JavaScript • TypeScript • Solidity

Frameworks & Libraries: React • Next.js • Node.js • Tailwind CSS • Web3.js • Hardhat • Supabase

Tools & Platforms: Git • REST APIs • n8n • Figma • IPFS • MetaMask

EXPERIENCE

Software Development Intern - Lukanodes

July 2025 – May 2026 | Remote

- Built an internal AI agent that fetched tweets from selected industry handles and auto-generated on-brand draft posts, streamlining the team's social media content workflow.
- Contributed to building the Lukanodes company website, developing responsive frontend interfaces with React and Next.js.

Frontend Developer (Part-Time) - SurfCash

March 2026 – May 2026 | Remote

- Revamped the SurfCash platform UI, rebuilding core product screens with React and Tailwind CSS for a cleaner, more responsive user experience.
- Integrated Perena, a Solana-based stablecoin yield and liquidity protocol, enabling users to earn on-chain yield on their stablecoin balances directly within the app.
- Built the staking page end-to-end, wiring the frontend to on-chain deposit, yield-tracking, and withdrawal flows.
- Developed the frontend for the platform's token swap and cross-chain bridge features, integrating on-chain transaction flows into a responsive interface.

Freelance Full-Stack Developer - Self Employed

2026 – Present | Remote

- Delivered 3 production full-stack websites for clients using Next.js, TypeScript, and Supabase, including an ERP portal and a student portal.
- Built role-based authentication so each user type logs in to a personalized view showing only their own details, with Supabase handling authentication and the database.
- Owned the full project lifecycle: client scoping, UI/UX design, responsive interfaces, backend integration, and deployment.

PROJECTS

CropWise - Blockchain Agri DApp | TypeScript • Solidity • Hardhat • IPFS • Node.js Sep 2025

- Built a decentralized app for farmers to register, sell, and trace crops on-chain - ensuring full supply chain transparency.
- Integrated QR code traceability and on-chain data verification connecting farmers, distributors, and consumers.

IdeaMarketplace - Decentralized Idea Exchange | React • Solidity • Hardhat • IPFS • MetaMask May 2025

- Built a decentralized platform for buying and selling startup ideas using Ethereum smart contracts.
- Implemented visibility control in smart contracts: idea titles stay public; full details unlock only after purchase.

Soldevnet Scan - Token Tracker & Swapper | React • Jupiter API • Phantom Wallet • Solana Devnet Feb 2025

- Connected Phantom Wallet to fetch live token balances and last 5 on-chain transactions.
- Integrated Jupiter aggregator for real-time token swapping directly from the UI.

EDUCATION

B.Tech in Computer Science (Data Science) - ABES Institute of Technology

Graduated June 2026 | Ghaziabad, UP

LEADERSHIP & ACHIEVEMENTS

President - ISTE Student Chapter, ABESIT | 2024–25 - Led tech events, workshops, and innovation drives.

President - IT Technical Club, ABESIT | 2024–25 - Ran coding contests and peer-to-peer learning sessions.

Lead Organiser - Hacknovate 6.0 | Apr 2025 - Ran a 300+ team hackathon end-to-end.
